Thalidomide on the rise? Thalidomide, an orally administered sedative drug, was withdrawn from the market in 1954 following reports that it caused severe birth defects when used during pregnancy. However, thalidomide is reported to be a novel and effective treatment for the control of numerous types of medical conditions, including chronic pain, erythema, pruritus and onychomycosis. The mechanisms by which it exerts its effects have recently been explored, with the identification of multiple possible targets such as the cerebellum, ganglia, immune system, erythropoietin and the myeloid cell lineage. Furthermore, recent clinical trial data show that thalidomide can be an effective treatment for the control of a number of symptoms associated with inflammatory diseases, including rheumatoid arthritis, multiple sclerosis and chronic low back pain. The cost and potential side effects of the drug are minor, and it can be combined with other treatment modalities to achieve satisfactory results. What's New In AvarWord?

AvarWord is a free and easy to use program that allows you to use your word for presentations – the app is capable of extracting text from Word documents, which is subsequently read by an avatar you can customize to a certain extent. Helps you translate text to speech Featuring an approachable user interface, the program is a tool that can be figured out in no time, regardless of how tech-savvy you are. You need to start by opening a Word document, with the app being able to automatically extract it. While this saves time, the truth is it is a bit frustrating not to be able to manually select the Word file, especially considering that working with multiple documents could become a challenge. On the bright side, AvarWord does let you take control of your avatar, or at least to some point. To be more specific, you can select one of the default voices in Windows, David and Zira, and you may also adjust the volume and word rate. Lets you customize the avatar Aside from that, you can make changes to the light, the zoom, and the position of your avatar. As regards the way you control the avatar, you may want to know that there are Stop, Pause, and Play buttons at the bottom of the main window you can use in order to ensure everything sounds perfect. When you are done, all that is left for you to do is save your project, and you are ready to integrate it with your presentation.
