What's new in Simple Dot:

: Fusion P4 About SwingStar VR: Fusion P4 runs you Windows XP or Windows Vista and is a stable, full featured, optimized virtual world for your Windows powered PC. You can view and enter inside multiple social virtual environments at the same time - each fully compatible with the Virtual Rules of SwingCast® (shown at right). This is the developer/makers version. It is not a finished release. It will be upgraded and improved before a final release is available. We ask you use the Feedback tab for reporting issues if you find any! In order to run properly, you need to install a DirectX 9 graphics card which fully supports 3D rendering. For more information check out FAQ/Using a browser tab. Known issues: Windows XP does not like USB ports on back of system; you may have to disable some security features. See FAQ If you get a loadscreen after logging in, try rebooting the computer. Sometimes rebooting will fix things, other times it does not. When it doesn't, you need to close all SwingStar applications and restart the computer. Installation Requirements To install, you need: 25COUNTS A Motorola XT800 USB port for modem A Fast File Server (network share) version 5.1 or newer with Bluetooth turned on (not required) With PC's from around 2004 and 2007, enter these commands into a command prompt: * those commands are in the format "command path cmdname arg1 arg2 arg3.." When the cmd prompt populates, type "Yes". If you do not enter these commands, you can't install and run properly. NOTE: This is not a 100% checked or verified, but people have had success with this method and Windows XP. Updates You can update your virtual world from any computer connected to a Fast File Server and Windows XP or Vista by entering the following command in the command prompt or in the run box. "CMD="path"\UpdateFrom10.exe"" -sdpath" A shortcut to the InstallUpdate.bat command will be created for you in the Start Menu. If you need to automate this command use the batch file below for release 1.3 Using Virtual Sounds and the SwingStar System Console SwingStar virtual environments run in a fully

optimized Windows platform environment
