I'm working in eclipse and I use vim as the default text editor but it doesn't really provide what I need. A: I just used Sublime to edit text files with the comments, you can change to using comments by right clicking and choosing Sublime → Preferences → Settings-User and add the following line "templates": { "editor.sublime-text-3": "Packages/Sublime Text 3/Default (OSX).tmTheme" }, A: I have tried many text editors and my favorite so far is TextMate.
