During four pivotal epidemics, your choices will determine the fate of the world. During the outbreak of the “Black Death” in 1347, travelers and merchants bring death to far-off lands. The devastation marks a turning point in the history of Florence, where cosmopolitan merchants and workmen mingled during the Renaissance. During the Civil War and the American Great Migration, tensions escalate between Northern and Southern America. This era of racial tensions and economic chaos culminated in the influenza pandemic of 1918, which swept across the United States and Europe. During the Spanish Flu pandemic of 1919, the world breaks down as an infected general orders the American military to execute members of the American Expeditionary Force. Racial tensions run high and the world appears to be in a cold war. These events and other epidemics coalesce to form a plotline about the human response to epidemics. Your decisions, and the others you encounter, decide whether the world’s population survives. Choose Your Own Adventure Telling the story of four different cities by exploring the streets, you will witness and engage in crucial conversations that will impact those around you, as well as yourself. Every action you make, every conversation you have with the locals, as well as things like fighting against supernatural monsters, affects the storyline. Four Cities, Four Epidemic Episodes Athens The Plague of 430 BCE: After worshipping the Egyptian god, the gods and citizens of Athens become horrified by the cult’s involvement with the plague. The cult is destroyed by the Athenians. Marseille The Plague of 822: A plague in Marseille has devastated the population, and after the ship Grand-Saint-Antoine returns from a trade mission to India, the captain of the ship has the plague. Dr. Leeson travels to the town and is able to contain the virus. Philadelphia The Great Panic of 1918: William Cochran finds a person who has the flu and has died. Dr. Larkin informs him he has the influenza and will be quarantined. Dr. Cochran becomes a widespread super-spreader of the influenza virus. Louisville The Curse of the 4th Street Races: A race riot of rioters led by a racist Army general erupts. This event sparks the influenza outbreak which becomes the biggest crisis in the world. “Concealment” is a psychological horror adventure game, suitable for all ages. Everyday life is full of surprises. Our goal is to find out what happened at this unusual location and to unravel the mystery of what was behind the events that unfolded in this dreadful place. Irreconcilable differences Transient happiness was hard to find. We are in love and have been for months but lately have been drifting apart. We have been staying apart for the past weeks as I have been coming down with a common cold and she has been out of town. Now, she is the one I want to reach out to, not the other way around. I hope things will be better. Good times are coming. An engaging and enjoyable VR experience with a gloomy setting. Concealment is a first-person psychological horror game in which you play as a man named Michael, who has just returned home after spending weeks camping in an abandoned village in the woods. He believes that going back to the scene of the crime is his only way to reconnect with his wife, who has now moved out of the couple’s home without telling him where she is and is only in contact with him via phone and text messages. I played the game on PSVR, and I think that this version is the most enjoyable one available for that system. The game’s graphics are fair, but the game’s overall atmosphere and feel can be described as “dark.” The experience has a small story, but doesn’t delve into the creepy side of things. As you wander through the town, you discover bits of people’s lives, including graffiti, pictures on the wall, and abandoned objects. The biggest problem that I had with the game was trying to figure out how to get to the next location. Sometimes, I would find a power socket to recharge my batteries, but I never found a red switch that I could turn on for navigation. I really wanted to use the the game’s map, but it didn’t appear to offer that feature. There were two different kinds of maps, and I never could figure out the difference. I ultimately figured out that the map I was using was one of the most recent versions, and that one of the red switches that I had located allowed me to turn on the map. Concealment was one of the most engaging VR games that I have played
