

one of the things i really liked was the dialogue options. when making an ally, its no longer the pc making the decisions, its you selecting the options. you can also choose from a wide range of male and female characters. switching their dialogue is easy, as is choosing your character. theres also the ability to customize your own weapons and gear, a useful feature when the game just feels old fashioned. my only real beef with this aspect of the game would be the fact that it isnt very interactive or accessible, so you arent doing anything to impress it. it was hard to miss that this was an early build, because the hand drawn areas felt like a small area in the larger game. probably the best feature of this game is the faction system. each faction has its own history and story, and you can choose to ignore or go on the offensive against them. you can also join a faction or remain independent. theres a very different approach to this, with your choices changing the course of the game. once you start playing, youll see a real difference in the way the game plays and the character of the characters you play. one of the things i found odd when i got to hand it over to my brother is that the save system. it doesnt save per mission, but it will save all the time. you can still save before, during and after missions, and there are three different categories. theres one for missions, one for the side views, and one for the tactical map. at the moment this system works, but it could easily go wrong with the amount of people you have on your team. obviously, it would be good if the game offers more than one way to play. for example, in jagged alliance 2 you could pick one of the multiple characters and play through the single mission. in jagged alliance 3, this isnt the case. youll be taking on multiple mercenary missions as part of your rts capabilities in the tactical map. if one of your team dies, thats it, game over.

Jagged Alliance Rage Update 3-CODEX

this is where i found the tactical map to be the most useful, with the ability to take out mercenary camps as part of what the game does for you. not only does it allow you to get to know your team before the missions start, but its also a way of clearing out the local mercenary camps. the combat mechanics are this years equivalent to the original ja2, so if youre familiar with this game, youll have a good idea how its handled. its probably worth mentioning that cover doesnt block line of sight in certain situations, you can only see your targets through your cover. while movement is very easy due to the mouse control system they have tweaked the movement system to give players more control over enemies movement when they need it. for example you can throw a grenade onto a section of wall, and all enemy movement would be suspended for 5 seconds allowing you to move into position. in terms of updated weapons, they have refined and upgraded many of them so this game has an improved and more modern feel. in terms of the player class, they have added captain america so he can be used for different play styles. a lot of the original ja2 units have been replaced with a wide range of new characters. this includes a new commander, seer, doctor and bodyguard. each with their own unique classes and skill systems. for example, you may use the weapon upgrade to change your classes weapon to allow it to perform better as a pistol or for fast melee fighting. the jagged alliance devs have done a lot of work to the game systems and have kept the base game mechanics the same so no prior knowledge of the original would be a problem. 5ec8ef588b
