What's New in the BACO Fast Search?

BACO Fast Search is a handy and reliable application designed to perform searches on the web from the comfort of your desktop. It features support for (but is not limited to) major search engines such as Yahoo, Google, Facebook, Ask, Bing. The list can be extended to contain user-defined search engines. You can also use this application to open any number of web browsers from a single BACO Search toolbar and perform searches on any of them simultaneously. You can set any number of searches to run in parallel for fast searching. The

application displays a continuously updating list of results in a convenient, compact toolbar. On the other hand, by default, a new search is performed after selecting the first search results page (see below). If you want to use the last search, just perform a refresh or a reopen of the results page. This application was designed with simplicity, convenience, and ease of use in mind. For the advanced user, there is a wide range of additional features, including: Direct link to any search engine with a single click. No special settings are required. If you select a search engine supported by the application as your default search engine, then the BACO Search will open when you press the FAST button. BACO Fast Search keeps track of all your favorite search engines and allows you to store the recently used ones in order to open them at a click. You can limit the number of search engines that run in parallel at the same time. You can select the search engine as your default search engine. You can set a list of recently used search engines that are stored on your computer. You can re-arrange the search engines on the toolbar. You can add shortcuts to your favorite websites. You can create a shortcut of your favorite search engines or websites. You can use BACO Favorites to manage your favorites. You can run multiple instances of the same search engine simultaneously. You can send any search results directly to your favorite email address. You can search any email address as well as your favorite websites. You can easily move the number of search results displayed on the toolbar. You can create your own custom search engine. You can choose from several pre-configured auto-created search engines. You can also create a custom search engine. You can open any number of web browsers at a time. You can view your search results in any web browser at the same time. If you use a different default browser, the BACO Search toolbar will open in

that browser as well. If your new version of BACO finds a bug or a new feature that you like, please write to us. The software is freeware. If you like the application
